AgentPM User Guide – Simple Introduction

Welcome to **AgentPM**, your smart assistant for managing products! This guide is written for users who may not have much experience with web apps. Let's walk through what this tool does and how you can use it easily.

🧠 What is AgentPM?

AgentPM is a web app that acts like a smart Product Manager. It helps you: - Hire the right people - Plan your product features - Track team progress - Create launch campaigns - Learn from user feedback

You just need to upload the right files or click a few buttons—AgentPM takes care of the rest!

😪 What Do You See When You Log In?

You'll see a simple dashboard with different tabs like: - **Talent** – for hiring - **Roadmap** – for planning - **Progress** – for tracking work - **GTM (Go to Market)** – for launching - **Feedback** – for user reviews

Click on any tab to go to that part of the app.

🐱 How to Use Each Section

1. Talent (Hiring Help)

- Upload a **Job Description (JD)**
- Upload some **resumes**
- Click submit → You'll get a ranked list of best candidates
- Optionally: Schedule interviews (coming soon)

2. Roadmap (Feature Planning)

- Upload a CSV of **user feedback**
- AgentPM will find common requests and suggest what to build
- A roadmap is created showing what to do first

3. Progress (Tracking Work)

- See how your team is doing
- Check which tasks are done, stuck, or delayed
- Get a weekly summary report automatically

4. GTM (Launch Campaigns)

- Add the product features you're launching
- Choose your audience (e.g. developers, managers)

       • AgentPM writes emails, blogs, and social posts for you

5. Feedback (Learn from Users)

       • Upload user reviews or survey results
       • The system reads them and suggests improvements
       • Feedback is sent back to your roadmap

👉Do I Need to Know Coding?

No. You just upload files, click buttons, and read the results. Everything is automatic and powered by AI.

👉What Can AgentPM Help Me Do?

       • Hire better people faster
       • Plan smarter based on user needs
       • Track your team's real work
       • Launch your product to the right audience
       • Improve the product after launch

All this in one place.

😅Need Help?

Look for a **Help** button in each section or contact your admin. You can also refer to the full guide called *"AgentPM App Guide"* for advanced info.

Thanks for using AgentPM. Let your product grow—smartly and easily!
